DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 10/21/05 have been fully considered but they are not persuasive.
2. The applicant has included the language "slow-draining" in an attempt to distinguish the instant claims from the prior art. The applicant has properly found support for the term "slow-draining." However the specification is lacking a specific definition for this term. It is not clear to what degree the instant compositions will drain as the instant specification does not provide the requisite degree of detail to provide an objective comparison of the instant invention with those prior art inventions.
3. As the applicant has offered no evidence beyond arguments and as the prior art compositions do indeed form a foaming compositions such material limitations have thus been met.
4. The applicant further argues that Stern fails to teach non-neutral materials. The applicant has recited a single paragraph in support for this argument, however read as a whole Stern clearly teaches the non-neutral hazardous material. For example in the same column as recited by applicant Stern teaches the treatment of acidic petroleum products and the treatment of sulfur dioxide both of which are considered non-neutral and thus meet applicant's claim limitations.
5. Similarly in example 9 of the Stern reference a test is performed to control an ammonium spill. It is well known in the chemical arts that ammonium hydroxide is alkaline and would constitute a non-neutral material.
6. Thus it is not clear to the examiner how Stern fails to teach the instant claim limitations.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
